WOOD MOISTURE MEASUREMENT
nondestructiv, precise

**Experience the new features
of the EVO series !**

Innovation by passion

- Enlarged density range from 0,175 up to 1,075 g/cm³ dry density
- 21 wood groups pre-programmed
- Wood species/groups and densities are selectable at the display menu
- High-definition 128 x 64 matrix display
- Temperature measurement indicated on display
- Measuring depth indicator
- Display lighting
- Hold function to keep the current measured value on the display temporarily (for example at overhead measurements)
- Including soft case and batteries
- Ergonomically and tough designed housing with soft touch surface
- Self-calibration function
- Adjustable menu languages: German, English, French and Spanish

Wood moisture meter *EVOLUTION* nondestructiv, precise

How it works: As soon as the sensor plate is in contact with the surface of the wood measuring starts. The processor of the instrument analyses the sensor readings and displays the result as a percentage of moisture content in the wood.
