

AMBITION 1120 AUTO

HOMAG Edgebanding Machine

DURABILITY & CONSISTENCY

The Ambition program sets a new industry standard by innovatively combining the best of all worlds into a durable, adaptable, and reliable series of machinery solutions for any application. HOMAG designed this program for the world market to take advantage of economies of scale. At the same time, Stiles has specifically tailored the program with features to fit the unique demand of the U. S. market.

The Ambition **1120 AUTO** is designed for entry-level companies looking to process coil material (0.4—3 mm) and strips (0.4—3mm) with fast, automatic changeover from the machine control.

FEATURES:

- Rigid, welded steel frame
- Strengthened pre-cutter for cutting thick PVC edge
- Quick-change glue tank for easy maintenance
- Precision-controlled edge feeding to reduce wasted material
- Industrial feed track provides precise work piece guidance
- Minimum workpiece gap increases productivity
- Program controlled work units

SPECIFICATIONS:

machine length:	4,270 mm	(14 ft)
working height:	950 mm	(37 in)
machine width:	1,454 mm	(5 ft)
feed speed:	8 m/min	(26 ft/min)
workpiece thickness:	8—40 mm	(⁵ / ₁₆ —1 1/2 in)
electrical connection	208/230/440/480V / 3-phase / 60 HZ	
dust extraction	(4x) 80 mm, (1x) 100 mm, 1,665 CFM	
Compressed air:	16 CFM, 6 bar (87 PSI)	

Pre-milling unit with Diamond inserts. 100 mm diameter

Nested top fine trim with 3 roller tracing

Homag EasyTouch interface machine control
