

AMBITION 1440 FCG AT15

HOMAG Edgebanding Machine

Pre-milling unit with Diamond inserts. 100 mm diameter

DURABILITY, CONSISTENCY, & ZERO EDGE

The Ambition program sets a new industry standard by innovatively combining the best of all worlds into a durable, adaptable, and reliable series of machinery solutions for any application. HOMAG designed this program for the world market to take advantage of economies of scale. At the same time, Stiles has specifically tailored the program with features to fit the unique demand of the U. S. market.

The Ambition **1440 FCG AT15** is designed for mid-size companies looking to process coil material (0.4–3 mm) and strips (0.4–8 mm) with fast, automatic changeover from the machine control. Equipped with airTec Zero Edge performance and the ability to produce five piece cabinet door parts make this model a versatile solution for your needs.

Nested top fine trim with 3 roller tracing

FEATURES:

- Rigid, welded steel frame
- Top pressure belt hold down
- Isolation transformer with multi-tap voltage
- Zero edge finish with airTec
- QA-65 N Gluing Unit with easy purge system
- 22" FULL-HD operating touch screen
- Ability to groove from below in the face of the workpiece

Standardized Homag powerTouch interface machine control

SPECIFICATIONS:

machine length:	5,573 mm	(18 1/2 ft)
working height:	950 mm	(37 in)
edgeband height:	12– 65 mm	(1/2 - 2 1/2 in)
variable feed speed:	8 – 14 m/min	(26 – 46 ft/min)
workpiece thickness:	8–60 mm	(5/16–2 3/8 in)
electrical connection	208/230/440/480V / 3-phase / 60 HZ	
airTec compressed air	52 CFM, 10 bar (145 PSI), 1" ID airline	
machine compressed air:	15 CFM, 6 bar (87 PSI), 3/8 " ID airline
