

Homag SWT 335 QCH THREE HEAD WIDE BELT SANDER

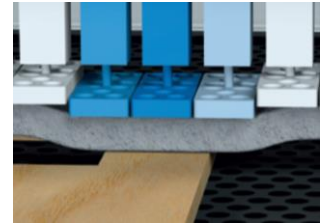

21" Power Touch Control

Cross Belt Sanding Head

Chevron Belt – Enhanced finish

Magnetic Pad Technology

The SWT 335 QCH three head wide belt sander offers ultimate sanding versatility. Ideal for veneer sanding, lacquer sanding, solid wood sanding, high gloss sanding, solid surface sanding...even special effect sanding. The SWT 335 QCH is loaded with features. This machine sets the standard with industry leading technology and features. Machine is equipped with a 21" Powertouch control with intuitive controllability, a cross belt sanding unit, a combi head, a chevron belt, magnetic pad technology, vacuum bed for small or sensitive part sanding, 4 heavy duty double supported jack screws and automatic head locking all built upon a heavy duty engineered steel frame.

Technical Specs	SWT 335 QCH
Sanding Heads	3
Sanding Width	53" (1350mm)
Abrasive Belt Size	54" x 103" (1370mm x 2620mm)
Working Thickness	1/8" – 6.25" (3mm – 160mm)
Feed Speed	Variable / Inverter driven
Controls	21" Powertouch Touchscreen
Drive Motor HP (per hd)	20 HP / 23 HP/ 23 HP all variable
Head Type	1: Cross belt 2: Combi head 3: Chevron pad
Segmented Pad System	MPS (Magnetic Pad System)
Machine weight	~ 12400 lbs (5600 kg)
Dust extraction	~ 4750 CFM
Full Load Amps	147 @ 460V

Specifications are subject to change.

ADVANCED FEATURES:

- Cross belt sanding unit ideal for leveling veneer, sanding short grain, lacquer or high gloss sanding or polishing
- Chevron belt technology for enhanced finish sanding
- MPS Magnetic Segmented Pad Technology with 12.5mm pad resolution for ultimate control of pressures and sanding results
- 21" graphical based touchscreen controller for intuitive machine controls and ease of use
- Constant passline feed belt with infeed rollers for easy loading, unloading or integration into lines
- Air jet belt cleaning for longer belt life when fine sanding
- Poly-V belt drives on all sanding heads for maximum horsepower and minimal vibration
- Vacuum belt for secure workpiece holding even when sanding small parts
- Automatic head locking for quick and easy belt changes
- Cleaning brush to help eliminate and contain dust
- Robust frame design with 4 heavy duty dual supported jack screws driven by a duplex chain system
