

**Quality**  
you can see,  
**Edges**  
you can see  
through.

The **EURACRYL ABP 310 CNC** diamond edge polishing machine offers quality milling capabilities bringing decreased manual sanding, flame polishing, and buffing requirements to discerning manufacturers of all sizes.

With a quick change of tooling directed by the machine control, the ABP is capable of milling **PMMA** (GS, XT, colored, coated, printed, paper clad, aluminum clad, embedded), as well as **PC, SAN, PET-G, PP, PVC, PS, POM, and PE.**

#### Advantages

- **10' multi-function** table configuration
- **CNC control** of traverse, milling depth, and angle
- Patented **Sorb-Tech** main beam
- Ability to polish **thick** materials
- **Rigid, oversized** clamping system
- Integrated **vacuum table** for enhanced part fixturing
- **Accurate high-speed** polishing
- Industry-leading **Euracryl ES** tool system
- **Touch-screen** user interface
- **Pre-programmed** processing library
- Industry-leading **service and support**
- Engineered and manufactured in **Germany**

*Touch-screen user interface*

*Integrated vacuum table design*

*Polish thick materials*
